

Simon Davies  
University of Bath  
EC10003 – Introductory Statistics

Additional Notes: Class6

(1) For those of you who have the 5<sup>th</sup> edition, please see the below table (note, not all are included here and there are additional questions in the 6<sup>th</sup> ed.. It's always best to check yourself too in case I've made a mistake!) Hope this helps.

<b>6<sup>th</sup> Edition Question Number</b>	<b>5<sup>th</sup> Edition Question Number</b>
5.82	5.47
5.84	5.49
5.85	5.50

(2) Note Questions 5 is from the final exam 2005/06 and Question 6 from the re-sit in the same year. This means that when you come to revise for these exams, you should come back to this weeks solutions to check the answers...

(3) Note that in the solutions to Q5, the X and Y are not placed in the same columns as they are in the question. This is a matter of presentation and in no way changes the answer.
